<b>MARYLAND TOTAL</b>	43.0	35.0	35.2

**Sources:** Maryland Health Care Commission and Maryland Department of Health (bed inventory); Health Services Cost Review Commission's Inpatient Confidential Files (private chronic hospital patient days); and Maryland Department of Health's Hospital Management Information System (state-operated chronic hospital patient days).

**Notes:** The average annual chronic hospital bed occupancy rates are calculated based on the number of patient days divided by the number of licensed bed days available during the fiscal year period, ending June 30th.

This table reflects corrected calculations of the occupancy rate of chronic hospital beds at University of Maryland Medical Center Midtown Campus based on a corrected bed inventory.

In fiscal year 2020, Johns Hopkins Bayview Medical Center converted 16 of its 76 licensed chronic hospital beds to special rehabilitation hospital beds. The average annual bed occupancy rate for FY 2020 reflects that change in bed capacity at Johns Hopkins Bayview Medical Center.

In fiscal year 2021, University of Maryland Prince George's Hospital Center temporarily delicensed its 12 special hospital-chronic care beds, effective April 1, 2021. The average annual bed occupancy rate for FY 2021 reflects that change in bed capacity at UM Prince George's Hospital Center.

In fiscal year 2022, University of Maryland Prince George's Hospital Center's 12 chronic hospital beds ceased to operate.
